Reasons for Allowance

1. Claims 1-16 and 20-23 are allowed.
2. The following is an examiner's statement of reasons for allowance.

As per claims 1 and 11, although Tamai et al. disclose enqueueing the read or write request to be processed from among the read or write requests enqueueued to the queue according to a predetermined priority, Tamai et al. do not disclose altering an existing queue according to a predetermined priority. Therefore, the prior art does not teach or reasonably suggest altering placement of input/output requests in a queue in response to identifying that the storage array is close to permanently losing data, wherein placement in the queue of I/O requests for rebuilding at least a portion of the storage array is altered in order to increase priority with respect to host I/O requests.

As per claim 15, the prior art does not teach or reasonably suggest a queue controller configured to order requests in the queue structure so that host I/O requests are placed into the request queue structure below existing host I/O requests but above existing rebuild I/O requests when host I/O requests are to have priority.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Michael C. Maskulinski whose telephone number is 571-272-3649. The examiner can normally be reached on M-F 9:30-6:00.
